

Branding assets templates for Pega Mobile Client

When you build a mobile app in Pega Platform™, you can customize the branding of the app by using the latest version of the branding assets template. When you generate a native mobile app, Pega Platform examines the branding assets package and displays a warning if the package does not have the expected structure or contents.

Download the branding assets template for the latest version of Pega Mobile Client™:

Pega Mobile Client version	Advanced branding template	Simplified branding template
8.4.200+	n/a	 branding-assets-8.4.zip
8.2.100+	 branding-assets-advanced-8.2.zip	 branding-assets-8.2.zip

For download links to assets for legacy versions of Pega Mobile Client, see [Branding assets templates for legacy Pega Mobile Client versions](#).
