

Installing the prpcServiceUtils tool

To install the prpcServiceUtils tool, follow these steps:

1. Download the **prpcServiceUtils.zip** file for your version of Pega Platform.
2. Extract the files onto a shared location to which both the Pega Platform and any external validation engines have access.
3. Replace any existing Pega Platform files with the new files.

Extracting the **prpcServiceUtils.zip** file installs the tool, scripts, and related files, including the following files:

- **prpcServiceUtils.bat** and **prpcServiceUtils.sh**: command-line scripts
- **prpcServiceUtils.properties**: script configuration properties file
- **sample\jenkins-build.xml**: sample Jenkins build file to use when configuring Jenkins with the Pega Platform for automated application deployment
